

CLASSROOM ACTIVITIES

Early childhood education should have an opportunity to learn in positive environment to enjoy the learning process and feel comfortable and experience the concepts taught.

Class room full of little minds and curious eyes will always be eager to observe, understand and ready to learn. Concept based activities are the perfect way to help children master in key skills, pique their curiosity, and spark their creativity.

Activities provide a solid foundation for early elementary reading and Math concepts children will learn to work in a team and exhibit leadership qualities and good communication skills.

We have planned the curriculum and class room activities which go parallel to cater all the age group of kinder gardeners through different teaching techniques to stimulate auditory, visual and kinesthetic way of learning.
