

Report on Planetarium 2024-2025

“A star does not compete with other stars around it; it just shines.”

Planetarium Show for Grade 1 to 3 was organized on 11th July 2024, students had the exciting opportunity to visit the planetarium in the school premises. This was organized as part of their ongoing curriculum in science, focusing on space exploration.

The purpose of the show was to introduce, the wonders of the universe and enhance their understanding of celestial objects like stars, planets, and galaxies.

The students explored different space missions, learning about, space stations, and rockets. Highlight of the visit was the immersive starry sky show in the dome-shaped theatre. The children were transported into space. The show featured an awe-inspiring view of constellations, planets, and galaxies. It was as if they were flying through the solar system.

Students were visibly excited throughout the show. They asked thoughtful questions and expressed wonder at the vastness of space. The show of planetarium at school premises was a great success. It gave students a deeper understanding of the universe and sparked their curiosity about space exploration. The experience was not only educational but also inspiring, encouraging them to continue learning about the wonders beyond our planet.
