

NATIONAL PUBLIC SCHOOL

KENGERI, BENGALURU

Report on Field Trip-GKVK

Educational tours are an essential part of learning, offering students hands-on experiences beyond the classroom. As the saying goes, "I hear and I forget, I see and I remember, I do and I understand."

To enhance experiential learning, National Public School, Kengeri, Bangalore organized a one-day field trip to GKVK on 7th October 2024 for Grade 5 students. Accompanied by their teachers, students visited the Department of Sericulture, Department of Food Science and Nutrition, and the Department of Advance Centre for Plant Bio-technology.

At the Sericulture Department, students explored the silk-making process, learning about silk worms, their life cycle, types of cocoons, and how silk threads are obtained. They had a hands-on experience and enthusiastically asked questions, showing great curiosity.

In the Department of Food Science and Nutrition, students discovered the importance of a balanced diet, food preservation techniques, and the role of nutrients in human health. Experts explained how different food sources contribute to overall well-being.

At the Department of Advance Centre for Plant Bio-technology, students were introduced to innovative research in agriculture and genetics, including plant tissue culture, pest-resistant crops, and advancements in sustainable farming.

Apart from gaining knowledge, students enjoyed socializing with friends, and sharing snacks during the bus ride. The trip was an enriching and enjoyable experience, reinforcing classroom learning in a practical setting.
