Report on Mask-Making

“The future depends on what you do today.”

National Public School, Kengeri, organized a two-day Mask-making activity on 13th and 14th of December 2024, for the students of Grade 6, as part of their Life Skill Program. The objective of the activity was to introduce students to the art of mask-making, explore its cultural significance, and foster creativity and self-expression.

The session began with an engaging demonstration on the art of mask-making. The art teachers showcased various types of masks from different states of our country, explaining their cultural importance. The students were guided step-by-step through the mask-making process- about the materials and techniques involved.

Later, the students were given the opportunity to showcase their creativity. With great enthusiasm, they designed and crafted their own unique masks, encouraged to think outside the box and bring their imagination to life.

This activity served as a platform for students to appreciate India's rich and diverse cultural heritage while enhancing their fine motor skills and hand-eye coordination. The active participation of students reflected their excitement and eagerness to learn through hands-on experiences.

Skill-based education like this empowered students to develop practical abilities and confidence, preparing them for a brighter tomorrow.
