

National Public School Kengeri, Bengaluru

REPORT ON EDUCATIONAL TRIP- GRADE 6

NEHRU PLANETARIUM

National Public School, Kengeri, Bengaluru, organized educational trip to Nehru Planetarium, Bengaluru, for the students of Grade 6, on 18th July, 2024. An engaging documentary on the mysteries of the universe, captivated the students and sparked their curiosity about celestial bodies and cosmic phenomena.

The students explored a variety of exhibits showcasing detailed models of planets, rockets, and significant space missions. They were particularly fascinated by the interactive displays that allowed them to simulate space exploration and understand complex concepts through hands-on activities.

The highlight of the educational trip was the immersive session in the 'Sky Theatre', where students observed constellations and learnt about the latest advancements in space exploration.

This visit not only enhanced their knowledge of the cosmos but also inspired many to consider careers in science and technology. The trip also encouraged critical thinking and fostered a sense of wonder about the universe.

Overall, the trip was a memorable, enriching and impactful educational experience, in astronomy and space science, which left the students eager to learn more about the vast universe and its myriad mysteries.
