

National Public School Kengeri, Bengaluru **Report on Educational Trip- Grade 9**

On June 19 2024, the students of Grade 9 embarked on an educational field trip to the Toyota Ecozone. The students were divided into two groups, wherein each group was taken care by two different guides. The visit began with a guided tour of the eco-friendly manufacturing facilities, where students observed the innovative processes. Toyota employs to minimize environmental impact.

The guide explained the significance of using renewable energy sources and the company commitment to sustainability. The interactive session allowed students to ask questions and deepen their understanding of green technology and sustainable manufacturing. Additionally, the trip included a visit to the onsite green spaces, where students learned about Toyota initiatives in biodiversity conservation and waste reduction. This practical exposure reinforced classroom learning about environmental science and engineering.

Overall, the field trip to Toyota Ecozone was an enriching experience, providing valuable insights into real-world applications of sustainable practices and inspiring students to consider future careers in green technology and environmental stewardship.
