

# NATIONAL PUBLIC SCHOOL KENGERI, BENGALURU

## Power point Presentation

Students of Grade 5 prepared and presented Power Point presentations on various topics as part of classroom learning. The activity helped students research information, organize ideas, and present them using digital tools. It improved their communication, creativity, and confidence while presenting in front of the class.

Students used pictures, short points, and simple explanations in their slides. This activity supports NEP 2020 by promoting digital literacy, experiential learning, and student-centred learning. Overall, the presentation enhanced both knowledge and presentation skills of the students.
