Grade 4

Spin Wheel Activity

Life Cycle of a Butterfly/Frog

A spin-wheel activity on the topic Life Cycle of a Butterfly/Frog was conducted in the month of November 2025 for the students of Grade 4 to help them understand the life cycle of a butterfly and a frog in an interesting and interactive way.

A colourful spin wheel with different stages of the life cycles was prepared. Students were asked to spin the wheel and identify the stage that appeared. They then explained or arranged the stages in the correct order. The activity encouraged participation, observation, and quick thinking. Students enjoyed spinning the wheel and discussing the stages with their classmates.

The activity made learning fun and helped students easily remember the sequence of the life cycles. Thus, spin wheel activity reflects the NEP approach of making learning interactive and concept based.
