

**NATIONAL PUBLIC SCHOOL KENGERI, BENGALURU**  
**REPORT ON GRADE 8 D CLASS ASSEMBLY**

*The students of Grade 8 D presented their class assembly in the first week of November 2025, celebrating World Science Day for Peace and Development and Kanakadasa Jayanthi highlighting the harmony between knowledge, peace, and devotion.*

*The students introduced the mission and vision of World Science Day, emphasizing the role of science in promoting peace and sustainable progress. A captivating role play followed, showcasing how the contributions of Albert Einstein, Madam Curie, Dr. A.P.J. Abdul Kalam, Norman Borlaug, and Jane Goodall have benefitted mankind. The performance reminded everyone of the importance of using science wisely and compassionately for human welfare. In a lively debate on the positive and negative aspects of science, the students expressed thoughtful opinions on how science has improved human life while also bringing challenges that demand responsible use. The debate concluded that science itself is neutral—it is human intention that determines whether it becomes a tool for peace or destruction. Kanakadasa Jayanti was celebrated with devotion and enthusiasm offering prayer to the saint-poet Kanakadasa, followed by students presenting poems and Keerthanas composed by him. They also explained the meaning and moral message behind his writings, emphasizing his teachings of equality, devotion, and moral strength.*

*The assembly presentation beautifully combined the spirit of scientific progress and cultural heritage, inspiring students to balance knowledge with values, and intellect with compassion.*
