Report on Grade 9 A Assembly

*“Innovation is the key to progress-the more we innovate,
the more we progress.”*

Digital India is a flagship programme of the Government of India with a vision to transform India into a digitally empowered society and knowledge economy.

The students of Grade 9 A presented their assembly programme “Digital India”, to mark the ‘Digital India week’ which is celebrated in India in the first week of July every year. The overarching theme for Digital India Week is ‘Bharat’s Digital Path- Empowering Future Innovators’.

Digital India week was celebrated by the students on various digital technological developments happening in the country and to create awareness on cautious usage of it. They presented the programme by sharing elaborative information on digital India; sang a song on digitalization; enacted a skit ‘Analog to Digital: The Innovation Junction’, in which the life of people in the past and present times was presented; and a parade with various apps on placards which have made our life smarter was presented. The program ended with students taking oath to use technology wisely.

It was a great opportunity to raise awareness on the importance of digital literacy and how it can be used to improve the lives of the people.
