Report on Grade 7 Educational Trip

Our school organized an educational trip to Toyota Kirloskar -Motor Private Limited-Eco Zone for the students of Grade 7 on 22 July,2026. The purpose of the trip was to enhance our knowledge through practical learning and provide us with a valuable educational experience outside the classroom.

*The resource persons explained the importance and history of the place and also gave a detailed presentation on the **Toyota Environmental Challenge 2050**, which aims to reduce the environmental impact of vehicles and manufacturing processes. They explained Toyota's long-term goals, including reducing carbon emissions, minimizing water usage, promoting recycling, protecting biodiversity, and working towards a society in harmony with nature. The presentation emphasized that environmental responsibility is a shared effort involving industries, communities, and individuals. They introduced us the eco-friendly practices such as rainwater harvesting, waste segregation and recycling, energy conservation, tree plantation, and biodiversity conservation.*

The trip was both educational and enjoyable. The students gained new knowledge, improved their observation skills, and they learnt the importance of teamwork and discipline. They also had the opportunity to interact with their classmates in a different environment, making the trip memorable and fun. It was a meaningful and enjoyable trip.
