

NATIONAL PUBLIC SCHOOL, KENGERI, BENGALURU

Report on Grade 9 Educational Trip

An educational trip to Param Foundation Science Centre was organized for the Grade 9 students on 6th July 2026.

Param is a purpose driven public trust, an organization that promotes science, culture, art, history, and open innovation through a network of collaborative transdisciplinary hubs. The visit aimed to provide students with practical exposure to scientific concepts and encourage experiential learning beyond the classroom.

During the visit, the students enthusiastically explored a wide range of working models, interactive exhibits, and hands-on activities covering various branches of science. They actively participated in experiments that demonstrated principles of physics, chemistry, mathematics, and engineering in an engaging and meaningful way. The interactive sessions enabled students to observe scientific concepts in action, making learning both enjoyable and memorable.

The knowledgeable instructors at the science centre explained the functioning of the models and encouraged students to ask questions and think critically. The hands-on experience helped students develop curiosity, problem-solving skills, and a deeper understanding of scientific principles. Their active participation reflected their keen interest in learning through exploration.

The students were extremely happy throughout the visit and appreciated the opportunity to learn science in a practical environment. The educational trip inspired them to connect classroom knowledge with real-life applications, making the experience both enlightening and unforgettable.

The educational trip to Param Foundation Science Centre was highly enriching. It broadened the students' scientific outlook, strengthened their conceptual understanding, and fostered a spirit of inquiry and innovation. The memorable experience reinforced the importance of experiential learning and motivated students to develop a greater interest in science and technology.
