Report on Grade 10 C Class Assembly

"Life is like a movie—every day is a new scene, every challenge is a twist, and every choice shapes the story we create."

The students of Grade 10 C presented their assembly in the last week of September 2026, on the theme, "Cinema- The World of Stories, Creativity and Life", showcasing the evolution of cinema and highlighting the talented professionals whose creativity, dedication, and contributions play a vital role in bringing a film to life.

The assembly commenced with an inspiring thought connecting cinema with life. The highlight of the day was a captivating dance drama depicting the evolution of cinema. Through a harmonious blend of dance, music, and narration, the students showcased the evolution of cinema across the world—from its early developments in France and Spain, to its growth in the United States, and finally its remarkable evolution in India. The performance portrayed cinema 'transformation from simple moving images into a powerful medium of storytelling, creativity, and entertainment. In an engaging live podcast, "Cinema through Conversation", a student interviewed another student who portrayed the role of the director associated with the film Shakuntala Devi. The conversation provided an insightful glimpse into the creative world of filmmaking, exploring aspects such as direction, storytelling, challenges faced during production, and the process of bringing a real-life story to the screen. The podcast also gave students an opportunity to enhance their communication, interviewing skills, and presentation skills, while gaining a deeper understanding of the efforts and creativity involved in bringing a film to life. The presentation, "Unsung Heroes of Cinema" focused on recognising the heroes behind-the-scenes. Two students introduced various filmmaking professionals, including directors, cinematographers, editors, costume designers, makeup artists, sound designers, and choreographers. This was followed by an engaging ramp walk.

The assembly presentation successfully blended learning, creativity, technology, and performance, helping students appreciate the collective efforts behind film making.
