Report on Grade 8 C Class Assembly

The students of Grade 8 C presented their assembly programme on the theme, “Freedom Versus Protection: Age Restrictions on Certain Apps.” in the second week of August, 2026. The programme aimed to create awareness about the importance of responsible and safe use of digital applications among children and teenagers.

The students shared information about various apps and the reasons for age restrictions. The session highlighted the benefits of technology as well as the need to protect young users from inappropriate content, privacy risks and other online dangers. A debate was conducted on the topic “Freedom Versus Protection: Should There Be Age Restrictions on Certain Apps?” in which the students presented different viewpoints and confidently discussed whether such restrictions protect young users or limit their freedom.

The students also presented a meaningful skit based on a Parent-Teacher Meeting (PTM), highlighting the role of parents and teachers in guiding children towards the safe and responsible use of apps. This was followed by a panel discussion in which different viewpoints were shared about balancing freedom, responsibility and protection in the digital world.

Overall, the assembly programme was informative, interactive and thought-provoking. It helped students understand that freedom and protection must go hand in hand, especially while using digital platforms and applications.
