

NATIONAL PUBLIC SCHOOL, KENGERI, BENGALURU

Report on Grade 9 C Class Assembly

The students of Class IX C presented their class assembly in the fourth week of June 2026, on the theme, 'National Camera Day'

National Camera Day is observed every year on June 29 to celebrate the invention of the camera and recognize its importance in preserving memories, documenting discoveries and capturing the beauty of the world around us. Cameras have transformed the way we record events, express creativity, and share experiences with others. It is a powerful tool that helps us freeze moments in time. From early film cameras to today's advanced digital cameras and smartphones, photography has evolved tremendously. Cameras play a significant role in fields such as journalism, science, education, art, and communication. They allow us to capture important milestones, spread awareness about social issues, and appreciate different cultures and perspectives.

The students collectively put in their efforts to showcase the importance of this day. During the assembly Programme, the students gave a brief information about cameras and camera ethics through talks, interactive quiz and through a value-based skit. They also captured some memories with the Principal, Vice principal, Co-Ordinator and teachers.

National Camera Day reminds us to value the art and technology behind photography. The students celebrated photographers and the incredible ability of cameras to turn ordinary moments into everlasting memories.
