

COLOURS DAY REPORT

“Every child is a different colour of flower and all together makes this world a beautiful garden.”

For young children understanding colour is essential as they will use their knowledge in various areas of learning. To make it more interesting we celebrated colours' day “Pretty Shades” on 19th and 20th of July 2018.

All the Kindergarten classes were allocated with two different shades of colours and the classes were decorated with toys, balloons, streamers brought by the children. The primary and secondary colours were introduced to children through various activities.

Children were enthusiastic to visit each class of Kindergarten and Montessori and overwhelmed to witness the display. Children had great fun by reciting rhymes and jingles on colours.

Children made beautiful handouts which were designed to help the young children to identify and differentiate various shades of colours, talk about them and think about how colours attract, enhance and influence the little minds.
