REPORT ON MATHS MODEL MAKING COMPETITION

Grade VI TO VIII

Date: 9th & 16th November 2018

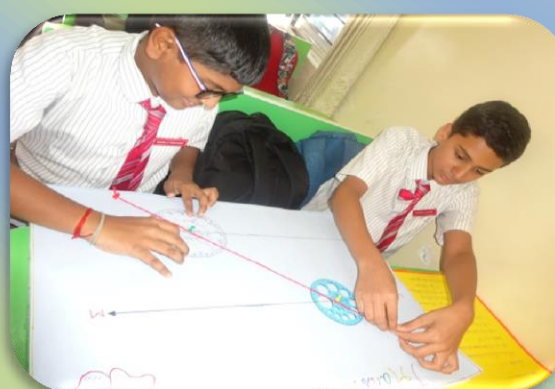

Math model making activity for grade VI, VII, and VIII was conducted on 9th and 16th of November 2018.

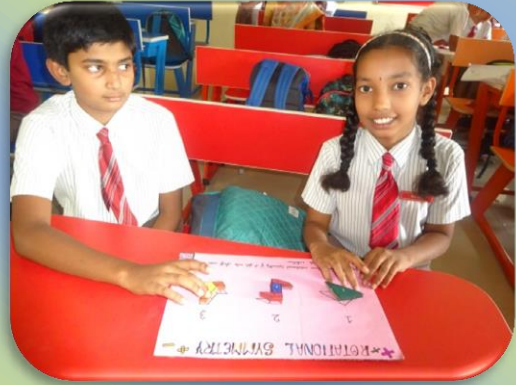

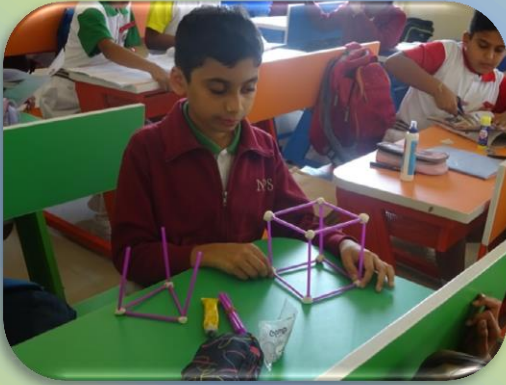

Children took active participation. They prepared models on different concepts related to arithmetic geometry and algebra. Students also prepared math puzzles. This opportunity gave the students a better understanding of the concepts. They also have understood how the values and formulae were deduced with certain experiments. This gave them a scientific approach towards the subject.

Students also got a chance to get the conceptual clarity about the subject by preparing the models.

Students prepared the models using cardboards, thermocol, sketch pens and water colours etc.

It was a team activity which helped the students to share their ideas and also to develop the team spirit. These models were exhibited in the exhibition, which was appreciated by the parents.
