

## NATIONAL PUBLIC SCHOOL, Kengeri, Bengaluru

### Assembly Report of Grade - 8 C

#### *“Know soil, know life”*

*The words SAVE SOIL are in the verge of continuous exchange. December 5th is marked as World Soil Day to raise global awareness about healthy soil thereby shedding light on the efficient way to sustainably manage soil resources. In modern times, soil degradation has become a massive problem that's associated with global climate change and the decline in the condition of the soil. So, the students of grade 8 c took the prestige to implant a deep understanding about soil to the school.*

*As the assembly opportunity was given, Students grabbed it and started to work upon it with great enthusiasm and curiosity. The first day began with the blissful voice of the anchor. Information was given on the significance and magic of soil. The second day began with an inspiring quote. It was followed by a melodious song and a rap prepared by the students.*

*The special assembly began just like any TV Show with the journalist. Making of compost was demonstrated and the school pledged to make it every day at their houses. It was followed by Sadgurus interview and information was shared about him and the school stood green washed by him.*

*The most awaited Grand Finale kicked off. The day started with prayers to the God followed by a pledge to save the soil. It was backed by a very inspiring thought to weed out negativity and to implant positivity to the school. It was followed by a dance which was indeed very spectacular and synergic. The assembly ended with a roar of applause. The assembly no doubt created an aura and ambience of how to save our soil.*
