KENGERI, BENGALURU

Grade 1 - 3 Educational trip report

'Education is life long journey, whose destination expands as you travel'

NPS Kengeri organized a Planetarium show at NPSK Junior wing campus on 2nd September 2022. Students of Grade 1 to 3 witnessed the mesmerizing wonders of space. Children enjoyed the simulated atmosphere of the space inside a 3D dome, which nearly looked like the reality. The technology inside the dome allowed the students to view the images and videos in 360 degrees, this created an immersive learning environment with shooting stars, constellations, planets and satellites. Every enchanting dimensions of space was brought alive before the students. The excitement among the children kept resonating through their unending talks about the show and their happy giggles.

This unique experience was indeed unforgettable.
