

REPORT ON FLORA AND FAUNA
FOR THE ACADEMIC YEAR 2016-17

To develop environmental consciousness through the observation, exploration and questioning. Science club – Flora and Fauna was conducted for grade 3 to 5 students as a part for their club activity.

Students used waste materials to do the best out waste activity. Models on organ system, habitats, rain water harvesting and solar system were displayed in a class room.

Flora and Fauna club aroused curiosity among students and enhanced group interaction and strengthened their scientific skills.
