REPORT ON TATTOO DESIGNING

Going with the latest trend of tattoo we conducted an art competition “TATTOO DESIGNING” on 06-01-2017. Unlike other art works, tattoo has few limitations with respect to colour, details and designing. The main intention of the competition was to make our students aware of designs and not to propagate the tattoo application. In fact, the side effects of tattoo on the skin were also explained during the event. Students came up with many beautiful concepts, ideas and designs (few were inspired by google as well). The tattoos created by students using simple line drawings with only black and white colours, left a mark on every one’s mind... unlike on the skin.

Students were judged on the basis of - innovative ideas, creativity, design and skill, presentation.
